

Release Note Animator4 Version 2.1.2

December 23, 2014

Animator4 Version 2.1.2 offers following enhancements:

- fixes in femzip-Support for Animator4 Database
- improved rendering performance of solids when cross section is enabled
- improved performance of large lists (ranking dialog, curve list, curve import)
- improved performance for animated gif playback
- modification of curve order in curve view
- restore User-IDs in modular ERFH5 if only single module exists

For further details and a complete list of new features, improvements and bugfixes see the WhatsNew tab in the About dialog in Animator4 or review the file WhatsNew.text in the installation directory.
