

Release Note

Animator4 Version 2.2.4

March 27, 2017

GNS Animator4 Version 2.2.4 offers following corrections and enhancements:

- Added support for Abaqus 2017 (Linux: not supported on systems older than RHEL6.5)
- Added support for JT 10
- ERF: added support for SPH_OUTPUT and failing TIEDs
- fixed initial path for Template in Load Variants dialog when a4 is started with '-u' option
- MAC: removed Nastran *.pch format from allowed file types
- added 'write toolbar settings' to write toolbar settings
- evaluate option "opt qfb" also when image popping is off
- fixed initial path for Template in Load Variants dialog when a4 is started with '-u' option
- presentation views can't be child views anymore

For further details and a complete list of new features, improvements and bugfixes please refer to the WhatsNew tab in the About dialog in Animator4 or review the file WhatsNew.text in the installation directory.
