

Release Note Animator4 Version 2.3.1

August 30, 2017

GNS Animator4 Version 2.3.1 offers following corrections and enhancements:

- Offscreen rendering for writing pictures/videos is now the default behaviour, hence commands 'opt qfb' and 'opt imp' are obsolete
- polar plot style 'chained vectors' added
- Improve reading performance of Pamcrash-ERF
- Dyna3D-Curves: added support for nodouthf
- ISO-MME files can be also scanned/read from a zip file

For further details and a complete list of new features, improvements and bugfixes please refer to the WhatsNew tab in the About dialog in Animator4 or review the file WhatsNew.text in the installation directory.
