

Release Note

Animator4 Version 2.4.4

May 11, 2020

GNS Animator4 Version 2.4.4 offers following new features and enhancements:

- Support for modular data in Ranking Dialog.
- New 'AutoScan' checkbox in import model dialog to enable/disable automatic scanning of model data on filename changes
- Partsdialog, additional context menu entry to create a top-level group even if something is selected.
- Performance improvements for various "opt..." commands

For further details and a complete list of new features, improvements and bugfixes please refer to the *WhatsNew* tab in the About dialog in Animator4 or review the file *WhatsNew.text* in the installation directory.
